New Dahlias

STANLEY JOHNSON

Pennypack Gardens

Cheltenham, Pa.

Sensational Introductions for 1940**"MAFFIE"**

MAFFIE (Exnar-Johnson) S. C. The sensation of the season. Massive blooms of intense red having perfect semi-cactus form. A clean strong growing plant of about 6 feet in height with insect resisting leaves. The flowers are held on long strong stems well above the foliage. The blooms have consistently averaged 13 inches in diameter by 8 inches in depth, and this dahlia has the necessary requirements to produce larger flowers. Already winner as the largest and best bloom at three of our better shows. Begins to bloom early and continues to flower throughout the season which feature is lacking with most giant flowering dahlias. Having ideal growth, formation and size makes this variety the dahlia of the year. We can look forward without hesitation to see this dahlia become one of our leading prize winners. The five blooms displayed at Camden, N. J. which won the "American Home" achievement medal were really a sight to see. Surely this dahlia deserves a place in your garden.

Root \$15.00

Plant \$5.00

GREETINGS.—It is a pleasure to present you this folder containing in my belief the best in up-to-date dahlias. Most any variety will win for you at our best shows or attract much attention in your garden.

Many thanks to everyone of you who have advised me personally or sent fine letters stating that my previous introductions are really great exhibition dahlias. I feel confident that the 1940 introductions will make just as impressive record. Although I won three "American Home" achievement medals this past season the real enjoyment comes when I learn of your winnings.

The foreign dahlias are briefly described but they all are first class exhibition varieties. The new pompons and miniatures are truly outstanding.

STOCK.—Every root or plant will reach you in good growing condition, beyond this no warranty is expressed or implied. Not responsible for roots secured before April 1st. Considering high quality my prices give you more for your money.

Introducing for 1940

RICHARD WATTS (*Johnson*) F.D. A true formal with an unusual color. Burnt orange with shadings of gold color to the outer part and tip of each petal. This blending effect is most pleasing. The flowers are 8 inches to 10 inches in diameter having a good depth as the petals entirely fold back to the stem. Sturdy growth of 5 feet in height produces flowers freely on strong stems well proportionate with the foliage. Winner of the "American Home" achievement medal at the Pennsylvania Horticultural Society's show. An exhibition dahlia that will be admired in every garden.

Root \$10.00 Plant \$3.50
